

Durable Tags that Last

428 Yellow Plastic Tag

Description: This is an extremely versatile colored product for lumber tags, tree tags, nursery tags, brick tags, wire and cable tags, fence tags, pallet labels, etc. Lumber yards typically use this type of tag to identify type, grade, size, etc. and they tend to attach their tags using a staple gun or nails so it is important to use a durable, tear-resistant material such as our 428 Yellow Plastic.

You will find this high-density construction is perfect for harsh environments because it withstands moisture, chemicals and cold temperatures. It also handles UV exposure outdoors for up to one year.

This material is FDA approved for use in food packaging.

Recommended Printing Ribbons: To achieve the best print quality and durability, use EIM T96/97 or T84/85 resin ribbons. For short term use and abuse, wax/resin ribbons such as our U39 or T44/45 also work.
