## Labels that Last

## 340 White Polyester for Durable Label Applications

Description: This thermal transfer material is made for printing with our durable resin ribbons. The face is scratch resistant, waterproof and will handle occasional exposure to lubricating oil. Testing with household cleaners and mild acid demonstrate no effect to the label or adhesive. The high-performance adhesive is aggressive and permanent, designed to work especially well on glass, metals and high surface energy (HSE) plastics. It will handle up to two years of outdoor exposure. The liner has been specially backcoated to prevent label pick-off, but is not recommended for fanfold applications.

Applications include, but are not limited to, instrument marking, long-term outdoor durable labels, under-thehood auto parts identification, asset-tracking and post-solder circuit board marking. It has also been tested for autoclaving and pressure-wash applications up to $50^{\circ} \mathrm{C}$.

## UL Recognized:

Marking \& Labeling Systems PDGQ2. See EIM UL Flle \#MH48554 for printed labels.
Marking \& Labeling Components PDGJI2 - See EIM UL File \#MH27790 for label materials.

Compliance: RoHS and REACH SVHC Candidate List
Recommended Printing Ribbons: T68, T80, or 184 Resin for UL Recognized Components
