Electronic Imaging Materials, Inc.

Labels that Last

672 White EverPeel® Plastic
with Permanent Removable/Repositionable Adhesive

Description: This thermal transfer label material offers a truly unique acid-free adhesive that will permanently stick to all types of surfaces and yet it will cleanly remove - even from glass. It can be reapplied over and over again - even to some coated papers and waxed corrugate! The adhesive has excellent UV resistance and is more aggressive than any other removable formula, yet it will not build up adhesion. It will stick in cold damp conditions and bond to most smooth surfaces like metal, glass, and hard plastic with long-term removability. It will also work on challenging surfaces like waxed candles, textured PVC or Teflon.

Note: This material is not recommended for UV Inkjet printing.

Applications include but are not limited to warehouse bins, totes and racking, retail POS labels or coupons, furniture and cabinet manufacturing, window and mirror decals, work-in-progress labels, instruction labels.

Recommended Printing Ribbons: T68/T69 and T96/T97 Resin ribbons

Compliance: CONEG Model Toxics Packaging
                    FDA 21CFR 175.105 for Indirect Food Contact

	Face Stock	Adhesive	Liner
Type	Plastic	Removable Acrylic	Kraft Paper
